## **About the Minnesota Home Ownership Center**

Recognized nationally as a model of home ownership and foreclosure prevention programming, the Minnesota Home Ownership Center convenes a network of 50 community-based nonprofit, government and tribal organizations to deliver homeownership education and foreclosure prevention services to low- and moderate-income households throughout Minnesota. Learn more at [www.hocmn.org](http://www.hocmn.org).

## **About Greater Minnesota Housing Fund**

The Greater Minnesota Housing Fund is a private, nonprofit organization whose mission is to strengthen families and communities in greater Minnesota through the creation and preservation of affordable housing. Learn more at [www.gmhf.com](http://www.gmhf.com).

## **About Minnesota Housing**

Minnesota Housing finances and advances affordable housing opportunities for low- and moderate-income Minnesotans to enhance quality of life and foster strong communities. Learn more at [www.mnhousing.gov](http://www.mnhousing.gov).

## **About Family Housing Fund**

The Family Housing Fund is a nonprofit organization whose mission is to provide safe, affordable, sustainable homes to families and children in the Twin Cities metropolitan area through ongoing partnerships with the public and private sector. Learn more at [www.fhfund.org](http://www.fhfund.org).

## **About HousingLink**

HousingLink is a primary distributor of affordable housing information to service agencies, housing providers, and policy workers in the Twin Cities metropolitan area and selected regions in Greater Minnesota. Learn more at [www.housinglink.org](http://www.housinglink.org).

## **About the Center for Urban and Regional Affairs**

The Center for Urban and Regional Affairs (CURA) is an all-University applied research and technology center at the University of Minnesota that connects faculty and students with community organizations and public institutions working on significant public policy issues in Minnesota. Learn more at [www.cura.umn.edu](http://www.cura.umn.edu).

## Study Purpose and Objectives

This supplement report was commissioned by the Minnesota Home Ownership Center, Greater Minnesota Housing Fund, Minnesota Housing, and Family Housing Fund. It provides policymakers and other community leaders with updated Minnesota foreclosure data as they design solutions to address foreclosures and their impact on Minnesota communities.

This is a follow-up to the Foreclosures in Minnesota (April 2008) report and subsequent Foreclosures in Minnesota Supplement (February 2009), in which comparable analysis and maps were presented. HousingLink was contracted to conduct the research and prepare the analysis in both reports.

Key updated foreclosure data included in this report are as follows:

- **Updated foreclosure counts for all Minnesota counties** including the Twin Cities seven-county metro area and Greater Minnesota to reflect Q1-Q2 2009 (January 1 – June 30) foreclosures.
- **Updated foreclosure rates for all Minnesota counties** to compare actual 2009 foreclosures to 2008 parcel counts<sup>1</sup>. The calculation of foreclosure rates makes it possible to compare the relative impact of foreclosure on areas with different population sizes.
- **Change in foreclosure rate methodology** that divides total foreclosures by parcels<sup>2</sup> rather than households. The advantages to such an approach are threefold:
  - New methodology more accurately reflects the foreclosure rate where multi-unit rental properties are concerned (e.g. a single foreclosure on a 10-unit rental property becomes a 1:1 ratio, rather than 1:10). Using households rather than parcels, in the rate calculation, understates the true foreclosure rate in counties with a relatively high proportion of multi-unit apartment buildings
  - Household counts are estimates based on an increasingly distant Census 2000, whereas parcels are based on actual, yearly counts.
  - There is a greater lag in county population estimates from the MN State Demographer (2008 numbers are available in late July of 2009) than with parcel data (2009 parcel counts are available in December of 2009).

---

<sup>1</sup> The previous Foreclosures in Minnesota Supplement (February 2009) report used household estimates to calculate the foreclosure rate, whereas this supplement report uses residential parcels to calculate foreclosure rate. See the *Change in foreclosure rate methodology* update for more information.

<sup>2</sup> County parcel data is provided by the Minnesota Department of Revenue and, for purposes of the foreclosure rate, includes property types 1 (Residential), 2 (Apartment), 5 (Farm with Buildings, >35 Acres), and 13 (Farm with Buildings, <35 acres).

It should be noted that the overall change in rate from the old methodology to the new is minor; with an overall 0.2% (point-two *of a percent*) change in rate for the state of Minnesota, and a 0.6% (point-six of a percent) change in rate as the highest difference recorded<sup>1</sup>.

- ***This report does not include a 2009 foreclosure projection.*** Reports issued prior to 2009 have included a foreclosure projection. These projections were generated based solely on recent foreclosure trends with the assumption that the same patterns would continue into the upcoming year. Due to greater uncertainty about future economic conditions, this semi-annual report does not include a projection.

Some factors that may contribute to foreclosures include but are not limited to: unstable economic conditions; increasing unemployment rates; falling housing prices; rising numbers of mortgage delinquencies; and resetting adjustable rate mortgages. Conversely, more active intervention and loss mitigation activities on the part of counselors and lenders may help to reduce the number of foreclosures.

## Methodology

To help understand the methods used in this report, it is important to outline Minnesota's foreclosure timeline. Data is collected throughout the process, much of which is useful for analyzing the characteristics of those mortgages and properties that have defaulted.

## Overview of the foreclosure process

There are two types of foreclosure processes in Minnesota:

- 1) *Judicial Foreclosure*, which is conducted like any other form of civil lawsuit.
- 2) *Foreclosure by Advertisement*, which is a type of Non-Judicial Foreclosure.

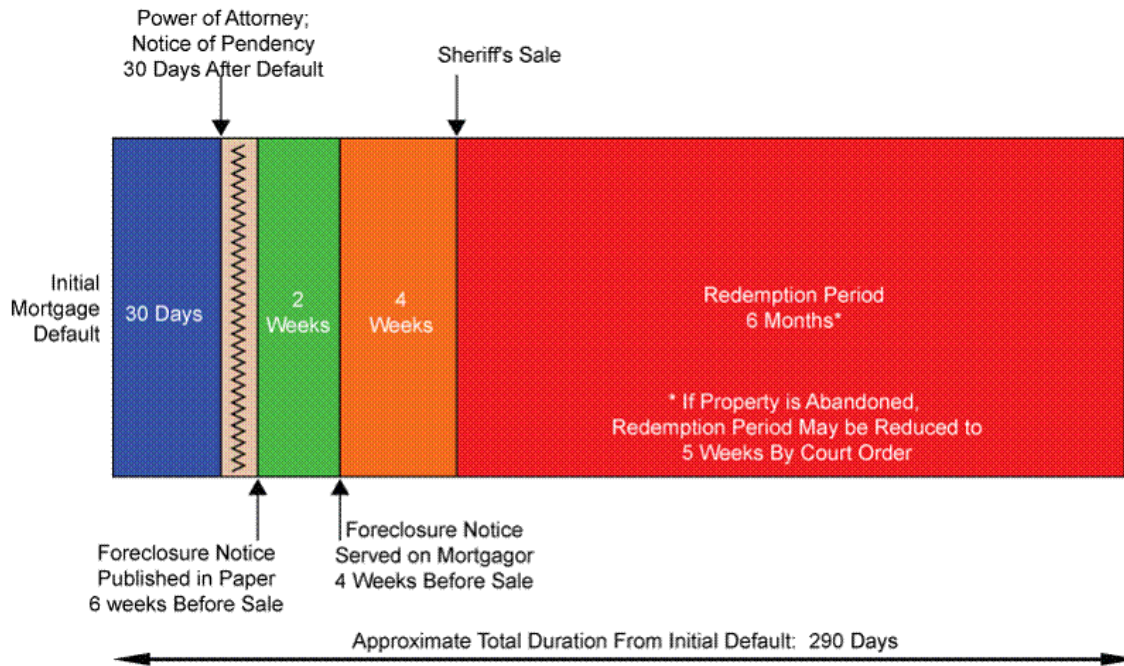

Since the large majority of Minnesota foreclosures occur by advertisement, that process is described in more detail below.

*Foreclosure by Advertisement:* Foreclosures in Minnesota take place at the county level and are regulated, for the most part, by state legislation. The foreclosure process can start as early as 30 days after a borrower first misses a mortgage payment. Once the mortgage is in delinquency, the lender empowers an attorney who files notice of pendency against the borrower, starting the foreclosure process.

---

<sup>1</sup> Ramsey County (0.6% change in rate from “household rate” to “parcel rate”), Hennepin County (0.4%), and Benton County (St. Cloud/Sauk Rapids, 0.4%) were the highest rate changes recorded; a statistic that likely results from a higher percentage of residents in those counties living in multi-unit rental properties.

### Sample Foreclosure by Advertisement Action Timeline on a Conventional Mortgage

*This chart based on information developed by Michael Grover of Federal Reserve Bank of Minneapolis (based on Minnesota state statute) and further refined by HousingLink.*

Shortly thereafter, the attorney publishes a foreclosure sale notice in a local newspaper (at least six weeks before the date of the sheriff's sale) and the county serves the filing to the homeowner. At any point before the sheriff's sale, the property owner can reinstate the mortgage by paying all dues, fees and expenses.<sup>1</sup>

After the notice has been published and served, the sheriff's sale occurs and the sheriff auctions the property off to the highest bidder, resulting in foreclosure of the mortgage. Following the sale is a redemption period of up to six months, during which the borrower can redeem the property by paying the amount of sale plus interest, taxes, fees, or liens on the property. Borrowers who do not redeem the property by the expiration of the redemption period lose title and right of occupancy in the property.

### Sheriff's Sale Records

Sheriff's sale records are the primary data that identify foreclosed properties and are identified as "foreclosures" within this report. However, it is helpful to understand the following:

<sup>1</sup> As of June 15, 2009, MN State Law allows homeowners to delay their foreclosure sale by five months. The homeowner must file for postponement between the first publication of the Sheriff's Sale and 15 days prior to the Sale. This reduces the redemption period to five weeks.

- Sheriff's sale records do not reflect the total number of properties that enter the foreclosure process.
- Some portion of properties identified in sheriff's sale records do not result in actual loss of title and occupancy for borrowers because they are redeemed within the allowed timeframe.
- A small percentage of sheriff's sale records do not relate to residential mortgages<sup>1</sup>. According to a previous study conducted by the Federal Reserve and Macalester College, less than 2 percent of Minneapolis-St. Paul properties sold at sheriff's sales are commercial. Also, HousingLink estimates approximately 2 percent of properties in its foreclosure database are the result of association liens. Taking into account these two figures, it is estimated that at least 95 percent of the foreclosures in this study represent residential properties.

## Data Collection

To obtain the number of sheriff's sales in each county, HousingLink partnered with the University of Minnesota's Center for Urban and Regional Affairs to contact all Minnesota counties. Counties were asked to provide HousingLink with the total number of sheriff's sales that occurred in their jurisdiction from January 1 to June 30, 2009.

## Foreclosure Rate Metric

The calculation of a foreclosure rate makes it possible to compare the relative impact of foreclosures on areas with different population sizes. The foreclosure rate used in this report identifies the number of sheriff's sales as a percent of total parcels<sup>2</sup>.

**Foreclosure Rate = [Number of sheriff's sales] / [for every 100 parcels]**

For example, a rate of 1.41 indicates there were 1.41 mortgages foreclosed for every 100 parcels in the specified location. This could be translated to one mortgage foreclosed for every 71 parcels.

---

<sup>1</sup> Residential mortgages include single-family and multi-family homes.

<sup>2</sup> Yearly parcel counts are supplied by the Minnesota Department of Revenue. As parcel counts for 2009 are not available until December 2009, the foreclosure rate calculation utilizes 2008 parcel counts.

## Minnesota Foreclosure Figures

The following pages include figures detailing foreclosures in Minnesota. They include:

---

<b><i>Foreclosure Count Map</i></b>	A map of Minnesota representing the sum of foreclosures by county in the first two quarters of 2009.	p.6
<b><i>Foreclosures by County</i></b>	Tables detailing foreclosure counts over the past four years, past six quarters, and Q1-Q2 2009 over the same period in 2008. Tables are displayed through multiple sorts.	p.7-23
<b><i>Foreclosure Rate Map</i></b>	A map of Minnesota representing the foreclosure rate (in percent) by county over the first two quarters of 2009	p.25
<b><i>Foreclosure Rates by County</i></b>	A table detailing foreclosure rates over the past six quarters, as well as rate comparisons between Q1-Q2 2008 and Q1-Q2 2009. Tables are displayed through multiple sorts.	p.26-37

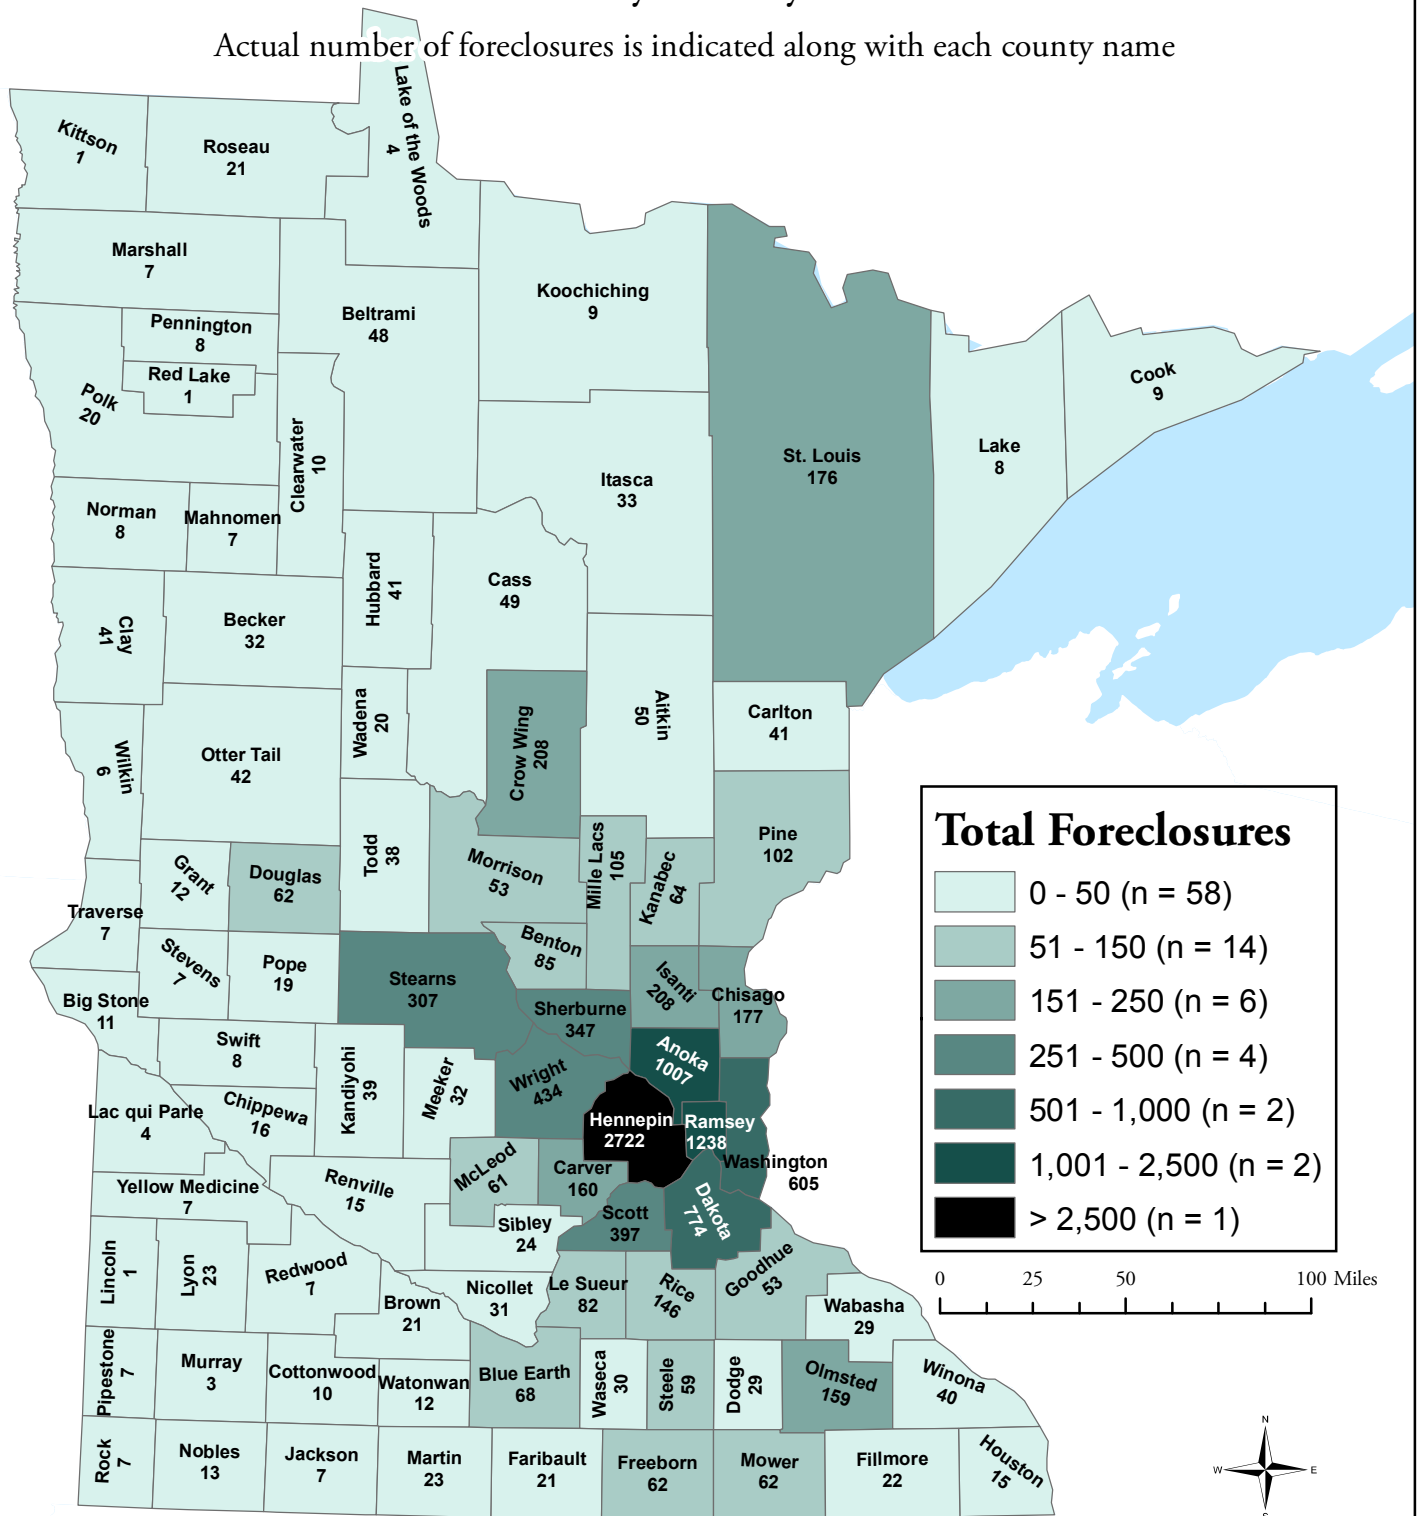

---

More Minnesota foreclosure figures representing historical data can be found online at [www.gmhf.com](http://www.gmhf.com) or [www.housinglink.org](http://www.housinglink.org)

\* Indicates a county did not maintain part or all of the data requested or was otherwise unable to provide the data.

^ Sum of four quarters in 2008 for Minnesota and Greater Minnesota does not equal "yearly counts" from Fig. 2-4, as Isanti County was unable to provide quarterly counts for that year.

Figure 11

# Minnesota Foreclosure Rates (Jan. 1 - Jun. 30 2009)\* by County

Actual number of foreclosures is indicated along with each county name

Foreclosures in Minnesota: A Report Based on Sheriff's Sale Data (August 2009)  
 Funded by: MN Home Ownership Center, Greater MN Housing Fund, Family Housing Fund, & MN Housing  
 \* Foreclosure Rate = the number of foreclosed mortgages as a percent of total residential parcels.  
 Data Sources: County reported sheriff's sales and 2008 parcel counts from MN Department of Revenue

**Figure 12: Minnesota County Quarterly Foreclosure Rates<sup>A</sup>** (sorted by county)

^ Foreclosure rate = the number of foreclosed mortgages as a percent of total residential parcels. Rate calculation for 2008 is based on MN Dept. of Revenue 2008 parcel counts. 2009 parcel counts are expected to be available in December, 2009; thus, the rate calculation for YTD 2009 is based on 2008 parcel counts.

\* Indicates a county did not maintain part or all of the data requested or was otherwise unable to provide the data.

^ Foreclosure rate = the number of foreclosed mortgages as a percent of total residential parcels. Rate calculation for 2008 is based on MN Dept. of Revenue 2008 parcel counts. 2009 parcel counts are expected to be available in December, 2009; thus, the rate calculation for YTD 2009 is based on 2008 parcel counts.

\* Indicates a county did not maintain part or all of the data requested or was otherwise unable to provide the data.
